SUMMARY
Backend engineer with 6 years of experience designing distributed systems and microservices in Java and Go.

EXPERIENCE
Senior Software Engineer, Cloudmart Logistics (2021 - Present)
- Designed event-driven microservices on Kafka handling 12k requests per second.
- Led migration of a monolith to Kubernetes, cutting deployment time from 2 hours to 10 minutes.
- Mentored 5 engineers and ran system design reviews.
Software Engineer, Pinecrest Software (2018 - 2021)
- Built REST APIs in Java and Spring Boot with PostgreSQL and Redis.
- Improved query performance by 60% through indexing and caching.

SKILLS
Languages: Java, Go, Python, SQL, C++
Systems: Algorithms, data structures, system design, microservices, Kafka, Redis, PostgreSQL
DevOps: Docker, Kubernetes, AWS, Terraform, CI/CD, Git

PROJECTS
Distributed Rate Limiter: Token bucket service in Go with Redis, open source.
Job Scheduler: Fault-tolerant cron service with leader election.

EDUCATION
B.S. Computer Science, Lakeview University (2014 - 2018)
